— Tyrtkov —

Global solution for in-game payments.

The introduction to our project should start with Roger Ver quote that Bitcoin 'is the most important invention in the history of the world since the Internet'.

Cryptocurrency had brought blockchain into our life. Blockchain technologies are being discovered in new areas every day.

Let us introduce you to Tyrtkov — universal payment unit for online blockchain games. CryptoKitties is the most famous project as of today. There is no single game currency in the world, each game has its own. We are going to fix it. Tyrtkov will be used as a payment tool in various cryptogames that are now gaining strong popularity.

— Incentives —

After the last wave of hype cryptocurrencies fluently integrate into our daily life. Need a new car? Or pizza? Laszlo Hanyecz can help you, of course, but reality is bit different. In fact you can get any opinions you need in regards to cryptocurrency. Google helps you.

Opportunity to make a new product. We are not the first project in this domain. But competition was always an engine of progress. Today is not an exception. We are not trying to become first. Suggestion of alternative and clear decisions of certain problems are our goals. We believe you will help us.

Our attitude towards the same projects will be friendly. We are interested in blockchain game development and it is possible only in case of cooperation among competitors.

Scaling and expansion are our goals. Profit is not the only benefit today. We are going to hire a significant number of blockchain oriented game developers to join our solution. Join Tyrkov [cryptocurrency.cryptocurrency](https://tyrkov.cryptocurrency.cryptocurrency).

Particulars

Stock exchanges (30%)

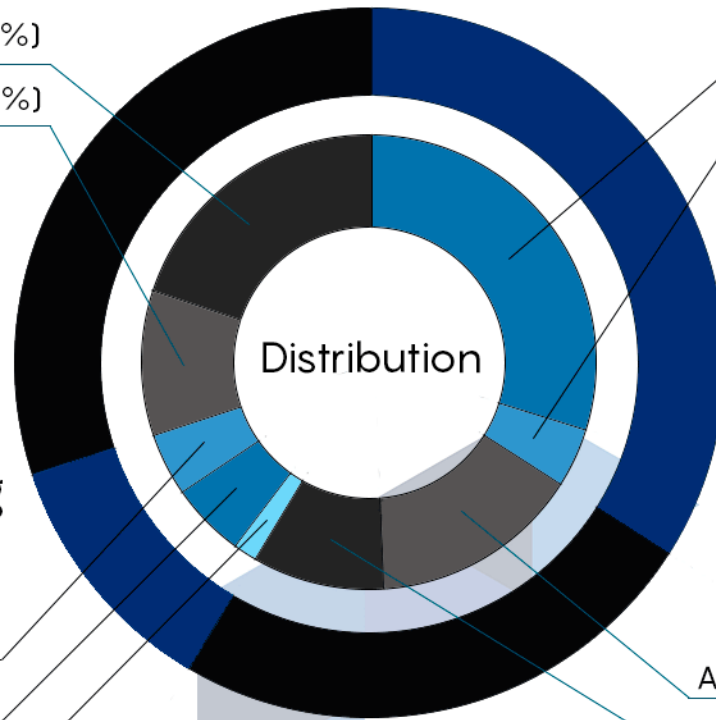

Reserved for listing (20%)

EtherDelta listed (10%)

- 

Roadmap

— Upcoming —

Our planes on April'18:

- Give a start to premium bounty and airdrop campaigns;
- Completion of negotiation with cryptocurrency exchanges;
- Start the negotiation with cryptogames developers;
- TYV token listing;
- Preparing for next investment round;
- Betterment of community services;
- Our team announcement.

— Stock exchange —

We are currently negotiating with crypto exchanges and in April we will get the information about the status. We will be available on EtherDelta in a few days. You can change ETH on TYV token. Preliminary price of token is not defined. It depends on demand and market position. We will be working on product improvement. It will allow and help to increase the price. Soon.

Ether**Delta**

— Encouraging —

Participants of our bounty campaign can get rewards by re-tweeting, sharing, posting and liking the official posts of the Tyrtkov official community services. It will be announced soon. The bounty that each participant can get will be based on the number of your followers and posts. Also we will pay depending on how many invites you can get and your rank on Bitcointalk.

— Communication —

We still working on community development. We are ready to communicate now via email and Bitcointalk.

Facebook, Instagram, Telegram, LinkedIn, Reddit almost ready. Coming soon.
